

CALL FOR CLINICAL CASES

Thank you for your interest in submitting a clinical case for UEG Week 2023!

Daily poster sessions on “Clinics in Gastroenterology and Hepatology” will provide the perfect forum for the discussion of difficult clinical problems. The accepted Clinical Cases will be showcased as E-Posters.

Please read carefully through the call and submission guidelines so that you prepare your clinical case accordingly.

- Submissions should not concern cases that can be managed using standard clinical guidelines but cases that deal with either uncommon diseases or difficult management issues.
- The posters are accessible on the poster terminals onsite for the duration of the whole congress, from Sunday until Tuesday in addition to the virtual poster exhibition on the UEG Week platform. **Posters allow all poster presenters to include a pre-recorded 5-min presentation.** As soon as the virtual congress platform goes offline, they will be published on the UEG website at ueg.eu.
- The Clinical Cases should be presented by a member of the team who directly participated in the case and should be illustrated by high-quality endoscopic, radiological and pathological images formats.

Important Dates

Opening of Abstract submission: Monday, February 27, 2023

Deadline for Abstract submission: Friday, April 28, 2023; Midnight (CET)
