

Masterclass on Chronic Pancreatitis

A multidisciplinary online and face-to-face learning experience

Online: November 2023

Face-to-face: 1-2 December, 2023 (Vienna, Austria)

UEG MASTERCLASS on Chronic Pancreatitis

A multidisciplinary online and face-to-face learning experience

This intensive training programme is highly interactive for both faculty and participants, maximising learning outcomes and expanding participants' knowledge using the latest training standards. With our perfect blend of online and in-person education, clinicians currently specialising in the field will be given an ultra-modern learning, networking and developing experience featuring top faculty in the field of chronic pancreatitis.

The **online phase** will be spread out over the month of November 2023, with no more than 1 to 2 hours of mandatory weekly assignments. This personalised online learning experience will feature a varied mix of live and self-paced materials, including:

- Short instructional weekly videos
- Assigned reading of clinical practice guidelines
- Live interactive webinars
- A self-paced online course on chronic pancreatitis

The online phase is carefully aligned with the topics and cases covered at the in-person event to provide an integrated learning experience. Participants will work together in multidisciplinary groups to solve clinical cases presented at the face-to-face meeting.

The culmination of this blended learning experience will be a 2-day face-to-face event in Vienna, Austria, featuring:

- Multidisciplinary case-based learning
- World-class faculty
- A mix of teaching formats, e.g., case studies, discussion, group work, quizzes, panels etc.
- Opportunities for networking and exchange with a multidisciplinary peer group and faculty

The two days will be structured into sections covering the following topics:

- 1) Diagnostic challenges
- 2) Pain management & duct drainage
- 3) Local complications
 - a) Pseudo cysts
 - b) Biliary obstructions
- 4) Pancreatic insufficiency and cancer
- 5) Setting up a multidisciplinary chronic pancreatitis service

Learning objectives

- To develop a knowledge base for long-term evidence-based patient management
- To have confidence evaluating and managing patients with chronic pancreatitis
- To create a multidisciplinary mindset to chronic pancreatitis
- To understand what's needed to operate an effective chronic pancreatitis service

Target group

- Clinicians (gastroenterologists, endoscopists, surgeons, radiologists) in specialized training with specific interest in chronic pancreatitis
- Individuals with specific interest in chronic pancreatitis after finishing their training/fellowship in gastroenterology and hepatology
- Interested in highly interactive online and on-site learning
